

# Barcelona Workshop on Global Governance

## “Access and Exclusion in Global Governance”

**January 11-12,  
2018**

The aim of the Barcelona Workshop on Global Governance is to provide a venue for the study of global institutions from an institutional and organization design perspective. While most research on international organizations has viewed these entities as the platforms where states - the fundamental units - interact, this forum will focus on international governmental organizations (IGOs) themselves as the building blocks of global governance.
