### RESEARCH PROFILE, CONTRIBUTIONS AND INTERESTS

*Sustainable land-use - Climate change mitigation- Biodiversity conservation - Political ecology - Rural livelihoods*

I am a Research Professor at the Institute of Environmental Science and Technology, Universitat Autònoma de Barcelona (ICTA-UAB) ([www.uab.cat/icta](http://www.uab.cat/icta)), where I co-chair the Laboratory for the Analysis of Social-Ecological Systems in a Globalised world ([www.laseg.cat](http://www.laseg.cat)). I am an international development specialist by training, who studies how 'sustainable' land-use management programs impact livelihoods, resource management institutions and people's behavior, mostly in the global South.

My research has been instrumental to understand the implications of these 'sustainable' land-use programs for rural people and to draw policy recommendations. My most important contributions include mainstreaming equity and legitimacy considerations in climate mitigation initiatives, particularly carbon forestry offsets, and PES more broadly; arguing that such initiatives can contribute to enhance social and gendered inequality, by deepening an uneven access to natural resources, when parachuted into rural contexts with insufficient knowledge of environmental and socio-political histories; discerning people's motivations to engage or reject such initiatives, and identifying the potential for motivational crowding; and co-developing state-of-the-art, research agenda-setting articles on REDD+, PES and bioenergy. More recently, I have also investigated rural change dynamics, placing the focus on farmers' vulnerability and adaptation to climate variability, markets and conservation approaches, as well as I have interrogated the production of knowledge of international scientific endeavours.

I have done fieldwork in Mexico and Tanzania, where I have coordinated data collection teams for several research projects. I have participated in 17 projects as either a Principal Investigator (PI) or Co-Investigator, through which I have managed over 2€million directly as PI. I have thus trained doctoral and pre-doctoral researchers in both qualitative and quantitative data collection, and I have guided 8 PhD dissertations and 25 MSc theses to completion and mentored 4 early career post-docs who have obtained tenure-track positions in Spain or abroad. Research findings have translated into more than 80 peer-reviewed scientific articles, several book chapters, dozens of policy briefs, working papers and consultancy reports. As a result, I have been a speaker or an invited panelist in over 70 international conferences, workshops and policy events, a reviewer for international research programs and journals, as well as a consultant for organizations like the Center for International Forestry Research, UNESCO, the Netherlands Research Agency, and the Catalan government.

My teaching has addressed topics in political ecology, ecological economics and the social dimensions of climate change and biodiversity conservation at undergraduate and postgraduate levels, first at the University of East Anglia (2002-2011), then at the University of Cambridge (2009-2011), and now at ICTA-UAB and the *Institut Barcelona d'Estudis Internacionals* (IBEI) (since 2011 and 2017, respectively). I'm also committed to serve the academic community and, for this reason, I'm one of the current editors of the journal *Geoforum*, and I sit in the international editorial board of *the Journal of Peasant Studies*. Spanish and Catalan are my mother tongues, and I'm proficient in English and fluent in Italian and French.
